What is SmartMarket?

SmartMarket is a professional e-commerce platform designed for businesses that operate through multiple branches — unifying customers, inventory, and administration in one intelligent system.

Online Product Selling

Inventory Management

Order Tracking

Branch Monitoring

Centralized Administration

Problem & Solution

Existing Problems

Difficult branch
inventory management

Manual order
processing

Weak reporting systems

Limited security

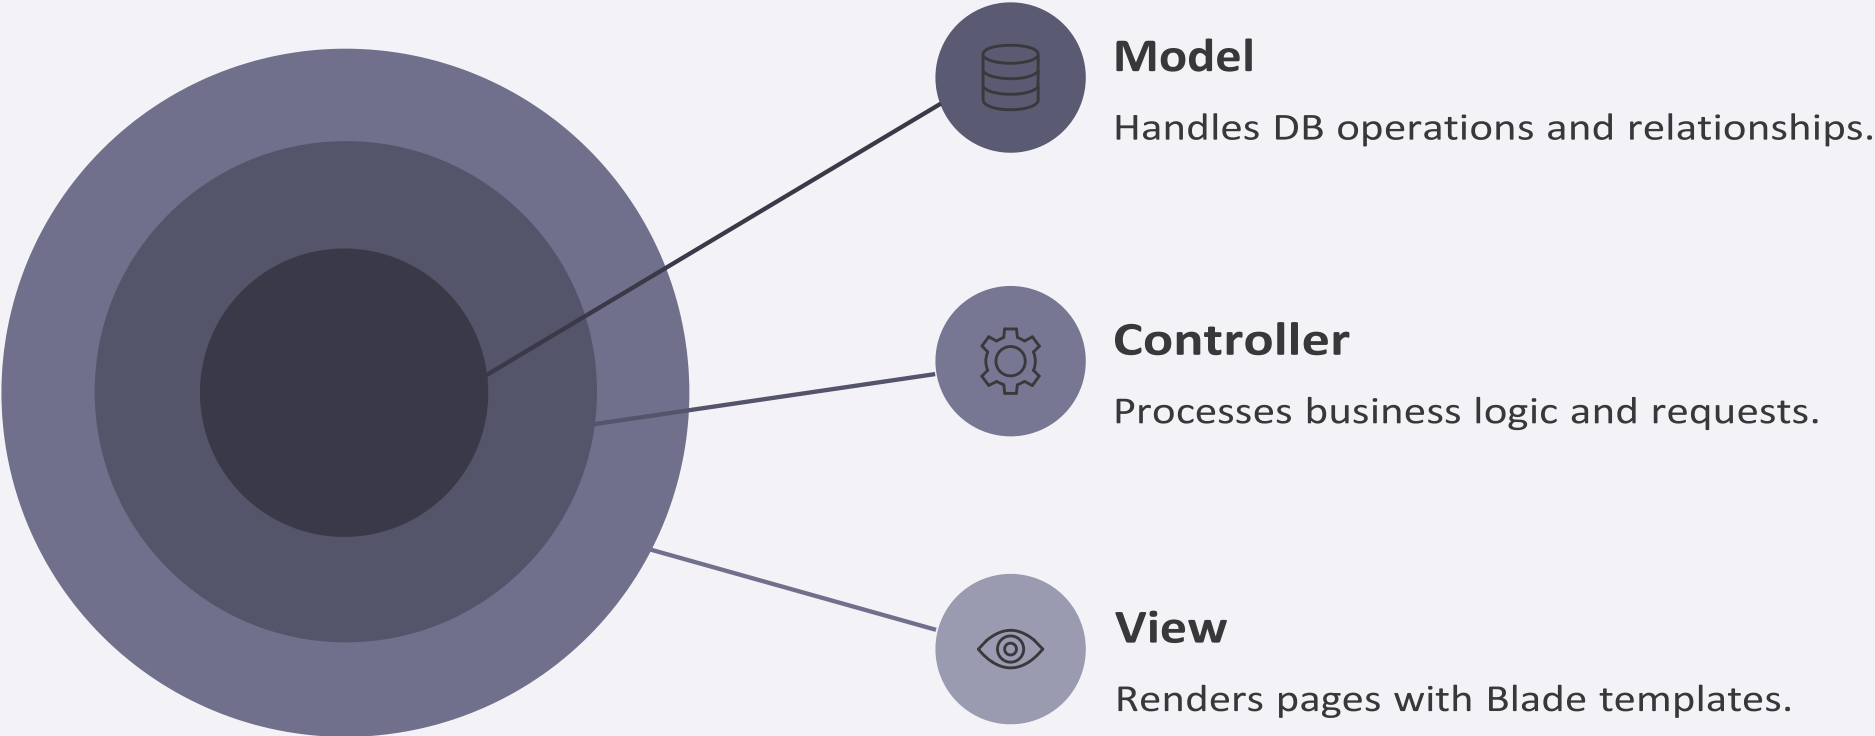

Poor customer
experience

Proposed Solution

A centralized smart system connecting **customers**, **branches**, and **administrators** in one unified platform — eliminating manual processes and enabling real-time visibility across all operations.

System Architecture

MVC Architecture

SmartMarket follows the Model-View-Controller pattern, ensuring clean separation of concerns across the application.

Organized Structure

Easy Maintenance

High Scalability

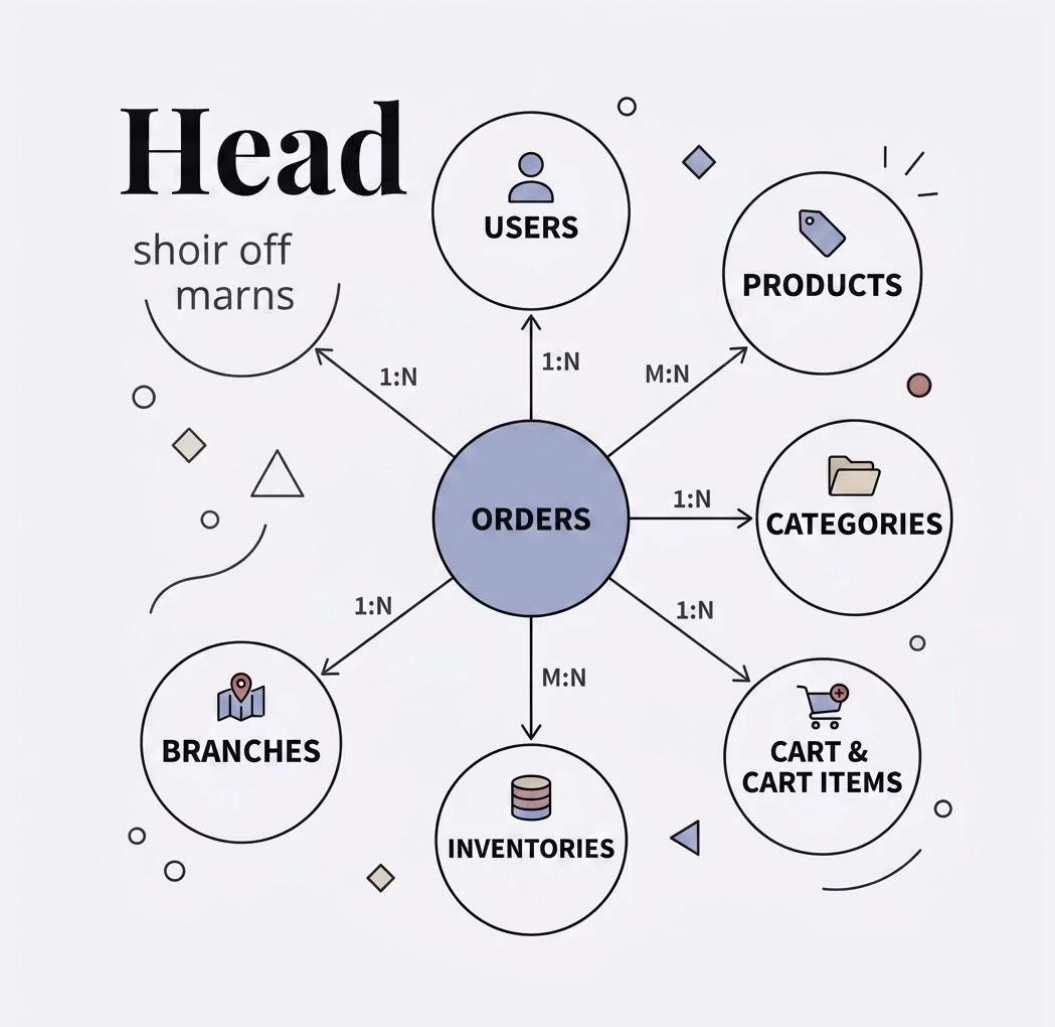

Database Design

Main Tables

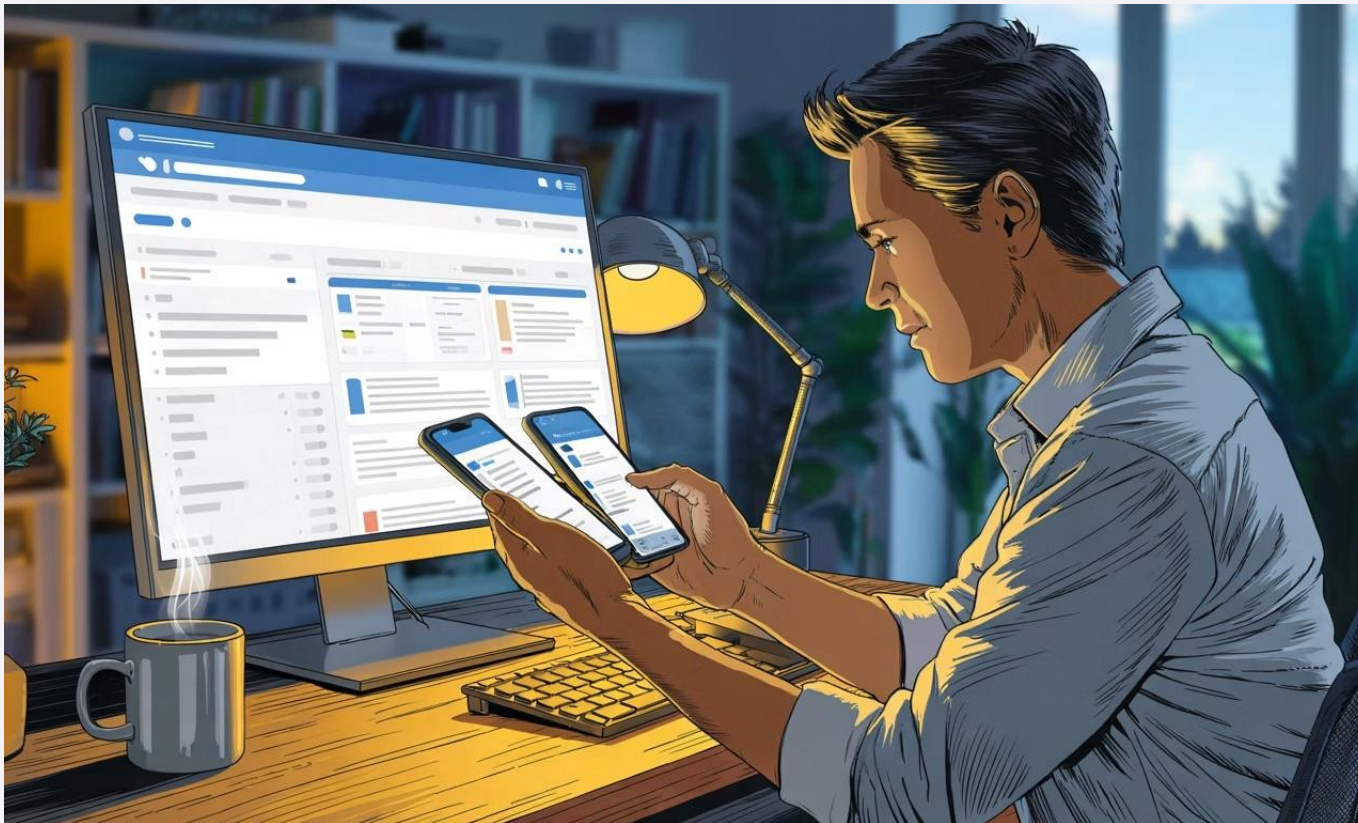

- Users
- Products
- Categories
- Branches
- Inventories
- Orders
- Cart & Cart Items

Relationships

- One-to-One
- One-to-Many
- Many-to-Many

Main Features

Customer Features

- Browse products
- Shopping cart
- Checkout system
- Order tracking

Admin Features

- Product management
- Inventory control
- Reports dashboard
- User management

Security Features

SQL Injection Prevention

XSS Protection

CSRF Protection
